PROFESSIONAL SUMMARY

Graduate Student pursuing a Master of Science in Information Technology. Software Engineer and Web Developer with one year of client facing, front-end and back-end experience. Strong coding, creative design, and web development skills with a passion for writing well-structured code for easier maintenance and high reusability. Innovative problem solver, applying excellent critical thinking to all phases of application development. Excellent communication skills with business clients, software engineers, and non-technical audiences.

EDUCATION

Master of Science, *Information Technology*, GPA: 4.0

Expected May 2027

University of North Carolina at Charlotte

Charlotte, NC

Coursework: *Web-Based Application Design and Development, Information Security and Privacy, Software Systems Design and Engineering*

Bachelor of Science, *Computer Science*

Dec. 2023

Elon University

Elon, NC

Coursework: *Software Design, Database Systems, Artificial Intelligence, Python, JavaScript, Java, Web Development*

Awards/Honors: *Dean's List (Fall 2023)*

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, C#, PHP, MySQL, PostgreSQL, MS SQL, CSS3, HTML5, C/C++, Rust

Developer Tools: VS Code, Visual Studio, Vim, IntelliJ, Eclipse, Postman

Technologies/ Frameworks: Linux, Bash, Zsh, Git, GitHub, GitHub Actions, ReactJS, .NET, NextJS, NodeJS, Spring Boot

WORK EXPERIENCE

Full-Stack Web Developer (Freelance)

Dec. 2023 – Present

Independent Author

Charlotte, NC

Tech Stack: *JavaScript, React, HTML, PHP, CSS, MySQL* | Live Site: scottayoungauthor.com

- Built a new website from scratch by leading frontend development (ReactJS), backend (PHP), database creation (MySQL), testing, troubleshooting, debugging and quality assurance, boosting monthly site visitors by 170%.
- Leveraged SOLID object-oriented design principles to devise website strategy, including marketing approach, branding, audience targeting, creative design, media selection, layout, and navigation, improving overall UX.
- Integrated a contact form using MailChimp APIs to automate data scraping and increase email subscriber volume.
- Utilized RestAPI integration to build an application to access a BlueHost database and store product information, streamlining future website updates through a dynamic process to save time.

Computer Science Teaching Assistant

Aug. 2023 – Dec. 2023

Elon University, Computer Science Department

Elon, NC

- Mentored 25-30 students in a computer science lab on coding exercises such as loops and data structures to enhance their ability to diagnose and debug coding problems in Python.

ACADEMIC & PERSONAL PROJECTS

Personal Portfolio | Live Site: grahamtyoung.com/

Sept. 2024

Tech Stack: *NextJS, Typescript, TailwindCSS, Vercel* | GitHub Repository: github.com/younggraham-t/portfolio

- Researched top developer portfolios as inspiration and used NextJS framework to model a similar style. Built in-line code for the UI using TailwindCSS and constructed the site with Typescript on Vercel for static hosting.

Chess Player Project | Course: *Web Development (Elon University)*

Fall 2023

- Completed a functional chess web app by using React for non-chess-related frontend code, pure JavaScript, and chess library for frontend code, NodeJS for backend, and CRUD API for user account creation.

Cell-Based Simulator Project | Course: *Software Design (Elon University)*

Fall 2022

- Simulated the spread of a forest fire using SOLID design principles and following the Model View Controller (MVC) design pattern, working with a team to improve reusability of code & reduce time spent on future designs.
- Gained exposure to other OOP concepts and Java design patterns such as MVVM, Singleton and Factory.
